- Scan QR Code to Order
- Use Mobile Device to Pay Ticket
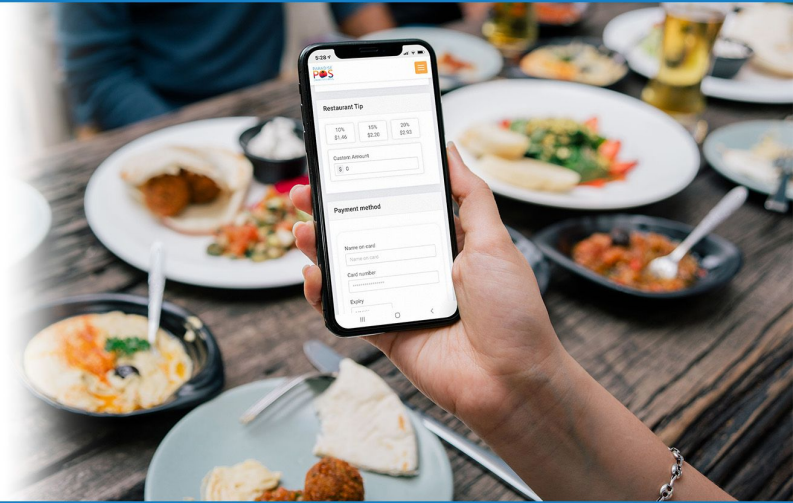

Contactless Order & Pay

Post QR Codes: add them to table tents or place them on menus.

Scan QR Code: use the QR code feature to let customers order and pay from their phone.

Contactless: no more menus, receipts, credit cards, or pens to touch when guests can order and pay directly from their phone.

Reduce Back & Forth: guests order and pay when they're ready, without waiting for a server, no handling of credit cards or pen needed.

Reduce Labor Costs: free up your servers from closing checks and increase time spent on hospitality.

Online Ordering Pro

Gift Cards: allow customers to use their gift cards from your business with their online order.
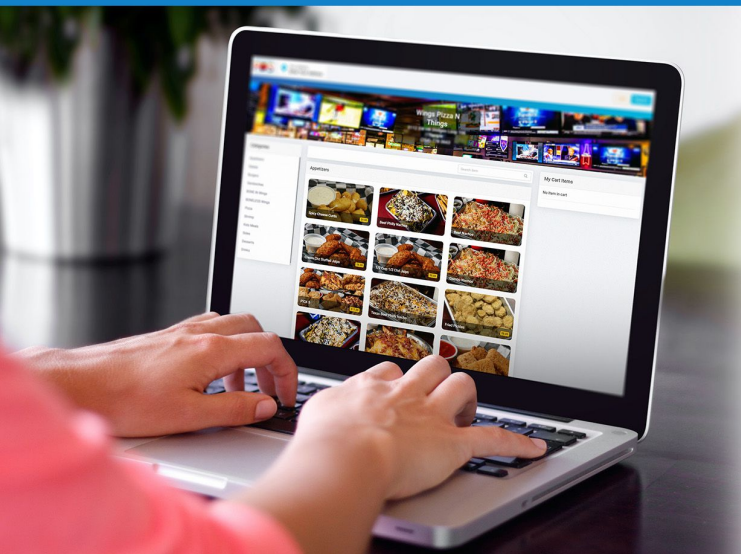

Promo Codes: entice your guests to switch to ordering from Paradise Online Ordering with promo codes.

Loyalty Points: track guests loyalty points when they order so they can continue to receive rewards.

Running Tabs: guests can browse the menu, place their order, and pay their ticket all from their own mobile device.

In-Cart Cross Selling: prompt suggestive sales before customers go to checkout.

Server Orders on Mobile Devices: enable servers to use online ordering on their mobile devices to create orders that they can then close out on the point of sale.

Online Ordering Retail

Shipping: the retail version comes with all the features of regular Online Ordering with the added ability to offer shipping to customers.

Options for Shipping: integrated with USPS, UPS, and FedEx through our Ship Engine integration

Shipping Labels: automatically creates shipping labels.

Item Weight: shipping prices are based on item weight that can be set per item.
